Response to Arguments

5. Applicant's arguments, see Response to Restriction Requirement page 2, filed December 20, 2005, with respect requested to reconsider the Requirement for Restriction in the office action have been fully considered and are persuasive. Therefore the Election/Restrictions of claims 1-66 has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Andelman (USP. 6,127,474).

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 2821

7. Claims 52-56 are rejected under 35 U.S.C. 102(b) as being anticipated by Andelman (USP. 6,127,474).

Regarding claim 52, Andelman disclose a method to form a LC resonator device, comprising:

- providing a conductive loaded resin-based material (Col. 8, Line 47);
- molding the conductive loaded resin-based material into the device (Col. 8, Line 53).

Regarding claim 53, Andelman disclose that the ratio by weight of the conductive materials to the resin host is between about 0.20 to 0.40 (Col. 8, Line 28).

Regarding claim 54, Andelman disclose that the conductive materials comprise a conductive powder (Col. 7, Line 27).

Regarding claim 55, Andelman disclose that the conductive materials comprise a micron conductive fiber (Col. 8, Line 3).

Regarding claim 56, Andelman disclose that a combination of conductive powder and conductive fiber (Col. 8, Line 48).

Allowable Subject Matter

8. Claims 1-51 are allowed.

Reasons for Allowance

9. The following is an examiner's statement of reasons for allowance:

Prior art fails to disclose the combination of the limitations as set forth in the claims: an inductor comprising a loop of the conductive loaded, resin-based material wherein at least one of the capacitor and inductor have a varying value as in independent claim 1.

Claims 2-29 are allowable for the reasons given above because of their dependency status

Art Unit: 2821

from independent claim 1.

Prior art fails to disclose the combination of the limitations as set forth in the claims: an inductor comprising a loop of the conductive loaded, resin-based material wherein at least one of the capacitor and inductor have a varying value; and an antenna coupled to the capacitor and the inductor as in independent claim 30.

Claims 31-51 are allowable for the reasons given above because of their dependency status from independent claim 30.

10. Claims 57-66 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Citation of relevant prior art

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Prior art Quackenbush (USP. 4,876,140) disclose laminate conducting plastic.
